1. The department of road building and maintenance of the Hungarian Ministry of Communications has been reorganized; henceforth the construction and repair of all highways and city streets will be the responsibility of this reorganized agency.

   a. The concrete construction section will cease to be a separate organization, and is going to be placed under the road department.

   b. The asphalt construction section will be charged with the construction and repair of city streets.

   c. The macadam road-building section is the third major division of the department of roads.

2. The department is also in charge of a special police, which is guarding the roads against sabotage. This force will cooperate with the local police and the road-supervising corps of the "partisans". There will be two exceptions: the Vásárosnamény and the Miskolc office of highway control will be entirely in the hands of Soviet personnel.

3. The department of roads will maintain 19 stations, one for each county, and also substations.

4. According to an order of April 1952, stations and substations have to report weekly on the road damage in the territory of their jurisdiction. Sabotage or unusual damage to the roads must urgently be reported and a copy of the report is to be handed to the local police and to the "partisan" organization and to the Party officials.
